SURESHKRISHNA M

Senior SDET | Test Automation | AI-Assisted Quality Engineering

Abu Dhabi, UAE | +971-509551174 | sureshkrishna.m@outlook.com | linkedin.com/in/sureshkrishna-m-060670124

11+ Years | Playwright • Selenium • REST API Automation • AI-Assisted & GenAI Testing

PROFESSIONAL SUMMARY

Senior SDET / Quality Engineering professional with **11+ years** building test automation frameworks and owning quality strategy across web, API and end-to-end systems in e-commerce, banking, fintech/KYC, mortgage loans and airline domains. Proven record **designing frameworks** from the ground up, integrating automation into **CI/CD** and setting coding and testing standards adopted team-wide. Extending this foundation into AI-assisted quality engineering: validating **GenAI chatbots** for accuracy, bias, hallucination and security/guardrail risk, and **building custom AI agents** for automated PR review and code-quality workflows.

CORE TECHNOLOGIES

- **Automation:** Playwright, Selenium WebDriver, Cypress, TestNG, Page Object Model, Framework Design
- **Programming / API:** Java, JavaScript, TypeScript, REST API Testing, Rest Assured, Postman, Integration Testing
- **CI/CD & Tools:** Jenkins, Buildkite, GitHub Actions, Azure DevOps, Git, AWS Console, Jira, Confluence
- **Quality Engineering:** Test Strategy, Quality Gates, Regression, E2E, Functional, System, Risk-based Testing
- **AI / LLM & Agents:** AI-Assisted Testing, GenAI Chatbot Testing, LLM Output Evaluation, Bias & Fairness Testing, Security & Guardrail Testing, Prompt Testing & Refinement, GitHub Copilot, Claude, OpenAI Codex, Custom AI Agents, Agent Skills

DOMAIN EXPOSURE

- E-Commerce • Airline/Travel Booking • Conversational AI/GenAI Chatbot • Banking • Fintech / KYC
  - Identity Verification • Mortgage - Loan Originations • Payment Gateway • PCI DSS
  - Enterprise Applications

PROFESSIONAL EXPERIENCE

Senior Software Engineer - Quality Engineering — Jun 2024 - Present

Firstsource Solutions Limited | Chennai, India

- Architected a Playwright + JavaScript automation framework from scratch for end-to-end web application testing, automating 450+ manual scenarios and reaching 85% critical-path coverage.
- Integrated regression suites into CI/CD and partnered with Development and Product to prioritize automation, cutting regression cycle time by 25%.
- Mentored 2 junior engineers and authored the framework's coding standards and conventions, since adopted team-wide.
- Designed and executed test suites validating a GenAI-powered chatbot's accuracy, intent recognition and response consistency across varied phrasing, flagging hallucinated or inaccurate outputs for correction.
- Performed security and guardrail testing covering PII handling, prompt injection and jailbreak-style inputs, then refined and re-validated prompts to resolve findings before sign-off.
- Adopted GitHub Copilot with Claude and OpenAI Codex for day-to-day code generation, debugging and test-failure analysis, improving triage turnaround.
- Built two custom AI agents, now used team-wide, for automated PR review against coding standards and automated resolution of PR review comments, accelerating the review-to-merge cycle.

Senior QA Engineer I **Feb 2022 - Feb 2024**

Socure India Private Limited | Chennai, India

- Owned end-to-end quality strategy for an identity verification / KYC platform, from requirements analysis through production release.
- Reduced post-production defects by 20% by moving test strategy and QA involvement earlier in the SDLC.
- Owned production Quality Gate sign-off across 10+ major feature releases, minimizing rollbacks.
- Designed and maintained functional and API coverage for data-driven identity-verification workflows using Rest Assured and Postman.
- Coordinated release readiness and communicated test status, risk and quality confidence to engineering and product stakeholders.

Senior Software QA Engineer **Jun 2019 - Jan 2022**

Mr. Cooper | Chennai, India

- Developed Selenium WebDriver + Java automation for a mortgage loan-origination platform, reaching 80% automation coverage across 12+ critical workflows.
- Generated 40 person-hours of monthly efficiency savings through expanded automation and reduced repetitive testing.
- Supported the full Agile QA lifecycle - sprint planning, test design, execution, defect management and release validation - improving defect turnaround through close developer collaboration.

Software Engineer - Application Testing **Jan 2018 - Jun 2019**

Valeo India Private Limited | Chennai, India

- Automated 30% of repetitive regression scenarios using Selenium WebDriver + Java, saving 60 person-hours monthly.
- Supported test planning, execution and defect management across 15+ Agile sprints.

Associate Consultant **Aug 2015 - Jan 2018**

Capgemini Technology Services India Limited | Bangalore, India

- Tested end-to-end booking journeys on an airline reservation platform and a PCI DSS-compliant payment gateway.
- Executed 500+ test scenarios across 10+ modules and drove test-automation and process improvements that reduced manual effort in later releases.

EDUCATION & CERTIFICATION

- Bachelor of Engineering - Velammal Engineering College, Anna University | Aug 2011 - May 2015
- ISTQB Certified Tester - Foundation Level, Software Testing
